

Thermo Scientific Cryopreservation  
Storage Equipment

indefinite sample storage  
**infinite possibilities**

**Thermo**  
SCIENTIFIC

## Thermo Scientific Cryopreservation Equipment

Our cryopreservation sample preparation and storage solutions offer scientists outstanding temperature performance, low operating costs and integrated control features.

**Extended Hold Times** – Unlike mechanical systems, Thermo Scientific LN<sub>2</sub> storage solutions are designed to offer consistent temperatures even when electricity is lost. Samples remain protected much longer during power outages than alternative technologies. With cryo storage tanks, the need to locate backup storage and relocate samples is dramatically reduced.

**Low Power Consumption** – Because most Thermo Scientific cryogenic storage products rely on liquid nitrogen, they consume less power than a standard light bulb, providing significant energy savings.

**Zero Greenhouse Gases** – Because LN<sub>2</sub> storage depends on the cooling power of naturally sourced nitrogen gas, there are no halogenated hydrocarbon refrigerants used and no greenhouse gas concerns.

**dependable,  
secure  
sample protection**

## Sample Preparation

Controlled-rate freezers prepare your samples prior to cryogenic storage, ensuring maximum viability. Available in standard and IVF format.

## Sample Storage Auto-Fill LN<sub>2</sub>

Storage systems provide the ideal combination of quick sample access, liquid nitrogen storage reliability, microprocessor auto-fill technology and storage capacity from 6,318 to 38,500 1.2-2.0 mL vials. Large capacity, high-efficiency storage solutions offer outstanding sample protection and storage capacities up to 93,000 1.2-2.0 mL vials.

## Sample Storage Manual-Fill LN<sub>2</sub> Dewars

BioCane, Locator and Locator Plus offer cost-effective storage flexibility and excellent portability with capacities from 180 to 3,600 1.2-2.0 mL vials for cost-effective flexibility and portability.

## Thermo Scientific CryoMed Controlled-Rate Freezers

Our CryoMed freezers feature an integrated control system (consisting of freezing chamber, microprocessor control and printer – all in one bench top unit), allowing multiple freezing profiles to be tailored to specific protocols. Freezer functionality is enhanced by a MS Windows®-based controlled-rate freezing interface software (included) that connects to your PC and external printer.

### Easy Programming and Monitoring

- The CryoMed controlled rate freezer can be operated directly from the unit's built-in microprocessor or remotely through the PC interface
- Includes a Java®-based PC software (as a standard feature) compatible with current Windows operating systems
- Backlit LCD provides at-a-glance operational status
- Allows at-a-glance from a distance to view sample and chamber tracking
- Chamber and sample temperatures and operation status are simultaneously displayed on a backlit LCD
- Chamber and sample temperatures are monitored by Type T thermocouples, which eliminate lag time and provide "real time" responsiveness
- Standard alarms enable open thermocouple, heater malfunction, high/low temp limit, temperature tracking, power failure, and completion of run
- Four-digit access code for added security
- Six standard preset profiles and ten user defined profiles for customer-created profiles are standard

### LN<sub>2</sub> Freezing System Components

- Dual solenoid valves increase LN<sub>2</sub> injection volume for precise temperature control and accelerated freezing
- Specifically designed air handling system and patented liquid nitrogen injection ring work in tandem for precise temperature control and uniformity
- Over-temperature protection for heating provides a safe working environment
- IVF chambers are compliant with human sample standards and provide convenient top access for manual seeding of samples

### Construction

- Type 304 stainless steel with exterior powder-coat finish for excellent durability
- Foamed in-place polyurethane insulation and Teflon® heat break minimizes cabinet condensation
- Bulb-style gaskets ensure tight door seal

# reliable long-term storage solution

## Thermo Scientific CryoPlus Sample Storage Systems

Thermo Scientific CryoPlus series provides the perfect combination of liquid nitrogen storage reliability and microprocessor technology. Storage capacities of up to 38,500 vials (2.0 mL) make the most of your laboratory storage space.

### Storage System Features

- Top-mounted control panel allows easy access to the CryoPlus' microprocessor controller for programming
- All lids incorporate foamed-in-place, high density urethane insulation with dedicated vent (U.S. Patent 5,779,089). Two independent, flexible gaskets reduce the migration of moisture into the chamber and reduce icing.
- 24 tricolor LEDs continuously display actual liquid nitrogen level and high-level/low-level setpoints
- Remote alarm contacts for in-house remote alarms or connection to a Sensaphone® Telephone Dialing System
- Counterbalanced UL 61010 third addition compliant lid with 100% clearance allows each entry into the storage area for retrieval of samples, while minimizing sample exposure time and maintaining a safe work environment.
- Heavy-duty casters are provided standard
- Incorporates a temperature sleeve as a standard feature, which provides colder temperatures at the top and more efficient operation in vapor phase
- Storage tanks are vacuum insulated with stainless steel interior
- Exterior cabinet is constructed of 18-gauge, cold roll steel with powder-coat paint for durability and a high quality uniform finish. Salt spray tests exceed 1,000 hours per ASTM Standard 117B-85
- All models come standard with LN<sub>2</sub> transfer hose

### For maximum product security, CryoPlus incorporates three different solutions

- A convenient front-mounted cabinet key lock for sample security
- A keyed lock on the microprocessor for temperature and alarm set-point security
- A rear-mounted recessed power switch to prevent accidental power shut off

### A complete sample storage solution offering for vapor or liquid phase

- Square and vertical racks for vial storage
- Frames and canisters for bag storage
- Specialty racks for cane storage
- Gas by-pass assembly delivers warm nitrogen to atmosphere until the control probe reaches set temperature. The by-pass valve closes and the fill valve is energized, preventing the storage area from being subjected to warm nitrogen gas. This is also required if the CryoPlus is connected to a manifold system to prevent LN<sub>2</sub> source alarms.

### Recorder Kit

	Factory installed - 120 volt, 50/60 Hz with 6 in. diameter circular chart, 7-day temperature recorder, pen and chart drive (Specify - top, left and right side mount - right side is default if not specified)	<b>201175</b>
	Factory installed - 220 volt, 50/60 Hz with 6 in. diameter circular chart, 7-day temperature recorder, pen and chart drive (Specify - top, left and right side mount - right side is default if not specified)	<b>201280</b>
	Replacement Felt Tip Pen	<b>245231</b>
	Replacement Circular Chart Paper	<b>197064</b>

### Hot Gas By-Pass Valve Assembly

	Factory installed - 120 volt, 50/60 Hz	<b>195021</b>
	Field installed (QI) - 120 volt, 50/60 Hz	<b>195700</b>
	Factory installed - 220 volt, 50/60 Hz	<b>195023</b>
	Field installed (QI) - 220 volt, 50/60 Hz	<b>195701</b>

### Thermal Temperature Sleeve

	Factory installed	<b>1950720</b>	<b>2950721</b>	<b>Standard</b>	
	Customer installed/retrofit	<b>1950706</b>	<b>1950707</b>	<b>1950708</b>	<b>1950709</b>

### Thermal Data Printer

	120V, 60 Hz Printer with cable assembly and RS-232 connector kit	<b>4000565</b>
	Thermal printer paper (5 rolls/package)	<b>4000566</b>

## high-efficiency storage

### Thermo Scientific CryoExtra Cryogenic Storage

Our new CryoExtra™ 8100 series high-efficiency storage solutions provide outstanding sample protection for scientific research with uniform cryogenic temperatures throughout the vessel. Automated temperature monitoring and microprocessor-based LN<sub>2</sub> level control provide peace-of-mind for valuable samples. Ease-of-use is ensured with built-in steps, flat workspace, and ergonomic lids. All vessels can accommodate both vapor and liquid phase storage.

- Four capacities from 463 L to 1,770 L
- Sample capacity from 19,500 up to 93,000 1.2 – 2.0 mL vials
- Minimal footprint – 1,770 L model has the same exterior footprint as the 1,745 L unit, saving valuable lab space
- Outstanding temperature uniformity
- Stable lid opening temperature
- Advanced temperature monitor and alarms
- Automated fill and level monitoring
- Push button de-fog for easy sample location
- Hot gas bypass keeps warm nitrogen gas from impacting samples during a fill cycle
- User comfort features and convenient, built-in workspace
- Lockable lid for sample protection
- Designed for global use with 100-240V and 50/60 Hz power supplies. Local power cords and plugs sets available.

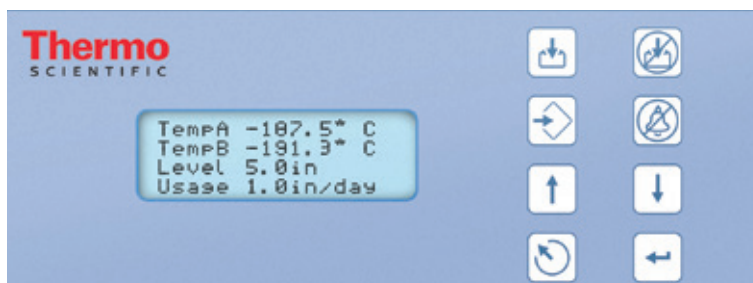

## Thermo Scientific CryoExtra 40 Temperature Uniformity\*

\* Based on internal data. October, 2011. TC2-14 were placed on the top warmest rack.

Built-in work space

Microprocessor-based controller

Interior trap door

### Maximum Capacity

Designed to maximize sample capacity with minimum footprint, CryoExtra accepts both vertical and horizontal racks. Thermo Scientific cryogenic racking solutions are designed for the vessel's storage configuration, further maximizing capacity. Our 93,000 sample capacity model has the same footprint as our 80,600 sample capacity model, saving valuable floor space.

### Uniform Temperatures

Minimal top to bottom temperature variation due to vacuum insulated stainless steel vessel.

### Stable Lid Open Temperature

Innovative lid and neck design ensures stable temperature even during lid openings, conserving liquid nitrogen and maintaining temperature.

### Advanced Temperature Monitoring Controller

Microprocessor controller monitors temperature using thermocouples accurate to +/- 1°C. Other features: user-adjustable alarm setpoint with full alarm mute options; built-in remote alarm contacts and easy to read level indicator.

### Automated Fill and Level Monitoring

Four thermistors monitor both the fill and control LN<sub>2</sub> levels to ensure proper levels. Self diagnostics ensure reliable sensor functioning. Monitor features: current temperature display, high temperature alarm, LN<sub>2</sub> level and alarms, sensor fail alarm and filling status.

### Hot Gas Bypass

Keeps samples safe from warm nitrogen gas during a fill cycle, improving sample security.

### Convenient Work Space

A stainless platform near the vessel opening provides a flat surface for ergonomic rack placement and speeding sample recovery. All units feature integral, folding steps and interior trap door for sub-carousel access.

# cost-effective storage

## Thermo Scientific BioCane Canister and Cane Systems

Thermo Scientific BioCane storage systems provide a cost effective way to store biological samples in canes. Available in four sizes, the system can safely hold samples for extended periods of time without replenishing LN<sub>2</sub>.

- All models include stainless steel canisters
- Canister handles are color-coded for easy canister identification
- Durable aluminum construction and vacuum insulation
- Narrow-mouth design minimizes LN<sub>2</sub> evaporation
- Lockable lid and optional low level alarm enhance sample security
- Available accessories
  - Roller base
  - Canes
  - Low level alarm
  - Cryo Sleeves

# quick, efficient sample retrieval

## Thermo Scientific Locator PLUS Rack and Box Systems

Thermo Scientific Locator Plus indexed storage systems provide cost effective sample storage and offer efficient sample retrieval. All models are available with an ultrasonic level monitor.

- Outstanding temperature uniformity: samples are stored below -180°C even when less than 2 in. (5 cm) of liquid nitrogen remains in the vessel
- Ultrasonic Level Monitor safeguards irreplaceable samples—Optional monitor provides continuous LED readout of liquid nitrogen level; activates visual and audible alarms when level falls below safe range
- Advanced vacuum insulation minimizes liquid nitrogen evaporation and reduces operating costs
- Lockable lid enhances sample security
- Includes stainless steel racks designed for use with 2 in. (5 cm) Nalgene cryogenic boxes (larger racks available for 5.0 mL ampoules in Locator Jr. PLUS, Locator 4 PLUS, and Locator 6 Plus)
- Available accessories
  - Roller base
  - Polycarbonate boxes
  - Cryogenic vials
  - Cryo logbook
  - CryoClaw
  - Low level alarm

## Thermo Scientific Liquid Nitrogen Transfer Vessels

Designed for storing and dispensing small amounts of liquid nitrogen, our Thermo Series includes four models with capacities from 5 to 32 L.

- Designed to bring liquid nitrogen to other cryo vessels
- Lightweight aluminum design and small neck opening insures ease of handling and low static evaporation rates
- Compact Thermo 5 and 10 dewars feature a convenient handle for pouring and for use in applications where only small quantities of liquid nitrogen are needed
- Thermo 10, 20 and 30 can be fitted with an optional self-pressurized withdrawal device to easily dispense LN<sub>2</sub> without pouring
- Available accessories
  - Withdrawal device
  - 12 mL dipper
  - Roller base

## Thermo Scientific Arctic Express Storage Systems

Our Arctic Express and Arctic Express Dual systems protect samples during shipment and storage. Featuring excellent flexibility and safety features, these systems can be used as dry shippers or laboratory cryo storage vessels.

### Arctic Express IATA-Shipper Transport Systems

- Worldwide shipment of precious samples with safety and security; approved for UN and IATA
- Two-week holding time preserves sample integrity
- Lockable cover with internal security compartment provides protection and sample isolation
- Aluminum container with handle holds internal security compartment

### Arctic Express Cryogenic Shipping Containers

- Innovative material absorbs liquid nitrogen to prevent spillage during shipment
- 14- and 21-day liquid nitrogen holding times allow specimens to be shipped safely
- Durable construction and sturdy base allow dry shipper to withstand rough handling
- Lockable lid prevents unauthorized entry
- Easily transported via most common carriers
- Lightweight aluminum design and convenient pail-style handle

### Arctic Express Dual Shipper Storage Systems

- When filled with liquid nitrogen, Arctic Express dual shippers can be used as a canister and cane storage system indefinitely with static holding times of up to 125 days
- Dual shippers hold six numbered, color-coded, stainless steel cans, (included) which accommodate canes that hold ampoules
- Hard-shell shipping container comes standard for both Arctic Express and Dual Shippers

## Thermo Scientific Thermo-Flask Benchtop Liquid Nitrogen Containers

Our Thermo-Flask liquid nitrogen containers feature inner vessels of borosilicate glass evacuated to  $1 \times 10^{-5}$  mm Hg. Available in stainless steel, and featuring vented clamped lids, carrying handles and rubber-cushioned bases.

- Durable, corrosion-resistant stainless steel exterior
- Shallow wide-mouth ideal for applications requiring flash freezing
- Convenient dish-shaped design perfect for benchtop use
- “Push-fit” insulated lid, vented to prevent pressure build-up

<b>Cryo Vials</b>	
<b>Each vial is constructed of sterile polypropylene with a white marking area and includes a screw cap.</b>	
1.2 mL, self-standing, conical interior bottom, silicone washer, one case of 500	4000198
2.0 mL, self-standing, round interior bottom, silicone washer, one case of 500	4000200
4.0 mL, self standing, round bottom, silicone washer, one case of 500	4000206
5.0 mL, round bottom, silicone washer, one case of 500	4000208
<b>Cryo Vial Color Coding Caps</b>	
Rainbow (assortment of all colors), one case of 400	4000389
<b>Cryo Boxes</b>	
<b>Individual</b>	
2.0 in. (5.1 cm) rectangular cardboard box, includes a 40-cell divider (for CryoPlus models)	4000189
2.0 in. (5.1 cm) square stainless steel box, does not include a 100-cell divider	4000238
2.0 in. (5.1 cm) square cardboard box, includes a 100-Cell Divider (for CryoPlus models)	4000014
2.75 in. (7.0 cm) square cardboard box, does not include a 25-Cell Divider (for CryoPlus models)	189470
3.0 in. (7.6 cm) square cardboard box, includes a 100-cell divider (for CryoPlus models)	4000015
2.0 in. (5.1 cm) high polycarbonate box with 100-cell divider, includes a numerical grid system printed on the cover	820010
2.0 in. (5.1 cm) high polycarbonate box with 81-cell divider, includes a numerical grid system printed on the cover	820011
3.0 in. (5.1 cm) high polycarbonate box with 81-cell divider, includes a numerical grid system printed on the cover	820013
<b>Dividers</b>	
Cardboard 100-cell divider	4000013
Cardboard 40-cell divider	4000174
Cardboard 25-cell divider	189387
<b>Canes</b>	
One cane, 1.2 mL – 6 ampoule	4000211
One aluminum cane for storage of 12.5 mm diameter Cryo Tubes	4000217
One Cane, 5.0 mL – 2 Ampoule	4000214
One aluminum cane for 9.2 mL and 10.0 mL goblets	4000216
<b>Cryo Sleeve</b>	
Polyvinyl Sleeve, 0.6 in. (1.5 cm) interior diameter, 10.8 in. (27.4 cm) long, one case of 100	4000218
<b>Tongs</b>	
<b>Transport vials from freezing racks to boxes</b>	
Stainless steel cryo tongs	4000388
<b>Claws</b>	
<b>Retrieve fallen object in the LN<sub>2</sub> vessels</b>	
CryoClaw	AY509X18
Replacement suction cups for CryoClaw	AY509X19

Description	Model No.
-------------	-----------

<b>Measuring Stick</b>	
LN <sub>2</sub> Measuring Stick	180143
<b>Gloves (Water Proof Cryo)</b>	
<b>Mid-Arm, 14.0 in. to 15.0 in. (35.6 cm to 38.1 cm)</b>	
Small	189441
Medium	189442
Large	189443
<b>Elbow-Length, 18.0 in. to 20.0 in. (45.7 cm to 50.8 cm)</b>	
Medium	189445
Large	189446
Extra-Large	189447
<b>Shoulder-Length, 28.0 in. (71.1 cm)</b>	
Medium	189448
Large	189449
Extra-Large	189450
<b>Aprons</b>	
Small, 36.0 in. W (91.4 cm)	189451
Medium, 42.0 in. W (106.7 cm)	189452
Large, 48.0 in. W (121.9 cm)	189453
<b>Cryo Marker Pens</b>	
<i>Fine tip, fast-drying, non-smearing, permanent ink; recommended for all Cryogenic vials at -200C (-328F).</i>	
Black, blue, green, and red, set of 4	4000221
Black, set of 4	4000222
<b>LN<sub>2</sub> Transfer Hoses and Phase Separator</b>	
4.0 ft. (1.2 m) Flexible Metal Hose, 1/2 in., 45° flare, swivel ends	4000400
6.0 ft. (1.8 m) Flexible Metal Hose, 1/2 in., 45° flare, swivel ends	4000401
Phase Separator, 1.3 in. (3.3 cm) diameter x 3.0 in. (7.6 cm) long x 1/4 in. FPT	4000571
<b>Low-Level Alarm</b>	
Low-Level Alarm (120V) with Sensor for any standard-sized LN <sub>2</sub> container, includes dry contacts for remote alarm	8130
<b>Sensaphone® Telephone Dialing Systems</b>	
4 pre-programmed numbers, 120V 60 Hz	400047
4 pre-programmed numbers, 220V 50 Hz*	400182
8 pre-programmed numbers, 120V 60 Hz	400134
8 pre-programmed numbers, 220V 50 Hz*	400183
<b>T-Valve Assembly</b>	
T-Valve assembly with fittings, used to connect two transfer hoses to a supply tank	4000290

\*Not CE marked

# wireless, tireless

with Thermo Scientific Smart-Vue wireless monitoring

Smart-Vue™ protects the quality of your samples 24/7 by continuously monitoring equipment conditions and will remotely notify you if conditions for sample integrity are compromised. In addition, Smart-Vue's data logging capabilities assist with compliance to FDA, GxP and other regulatory requirements.

- Wireless monitoring, alerting you remotely in the event of a power or mechanical failure
- Alert systems including real-time and visual alarms on the module
- Configurable data-logging, transmission cycles and upper/lower limits
- On-board single parameter module memory for up to 3,000 readings
- Automatic alarms for out-of-bounds conditions and technical problems
- Easy-to-read LCD display with the latest reading, alerts, signal strength and battery level
- Fully integrated with Smart-Vue client/server software suite
- 3.6V Lithium, replaceable battery (3,600 mA)
- Mounting kit with plastic holder, magnet, screws, cable ties, plastic cable holders and Velcro®
- Type: CE EN 300-220-1, FCC, EN12830, IC (Industry Canada), WPF (India), CMIT (China)

## > Ordering Information

Model No.	SV201-100-LSB
SV201-100-LSB	Package for 915 MHz regions*
SV201-101-LSB	Package for 868 MHz regions*
SV201-102-LSB	Package for 867 MHz regions*
SV201-103-LSB	Package for 434 MHz regions*

\* Smart-Vue for cryogenic storage includes wireless radio module system, external three-wire PT100 temperature probe; Range: -200°C to +50°C, calibrated at -196°C, -80°C and 0°C. Package consists of module, external sensor, 3.6V lithium battery, mounting holder with Velcro, magnet and hardware, sensor mounting kit.

# keep track of your samples

## Thermo Scientific Matrix and Nunc 2D storage tubes

When your workflow includes semi-automated and fully-automated platforms for high throughput, Thermo Scientific™ tubes allow robust storage and tracking of sample volumes ranging from 70 µL to 12 mL in 384-, 96-, 48- and 24-place arrays. We have storage formats available for temperatures down to VPLN, and multiple sealing options including ScrewTop caps and septa seals. Solid, one-piece construction means there are no labels to fall off and medical grade, class VI resin tubes are supplied free of RNase, DNase, endotoxins and cytotoxins and SAL down to  $10^{-6}$ .

- **100% leak tested** to ensure tube integrity and sample security
- **Designed for automated systems** including liquid handling, decappers and other automated platforms
- **Rack base and tube design** prevents the tube from spinning in the rack when decapping whether single tube hand decapping or, multi channel automated decapping
- **Available in Latch Racks**, specially-designed, stackable racks with a microplate footprint

## Thermo Scientific Nunc CryoBank tubes

- Nunc CryoBank storage tubes are ideal for users who need locking tubes that are not going to fall out during frequent movement and use without a rack lid. Trust Nunc storage tubes for ultra low temperature storage down to the vapor phase of liquid nitrogen.
- Screw Cap with integrated gasket ensures a tight seal every time and compatible with storage across a range of temperatures.
- ScrewTop can be resealed numerous times with no effect on sealing integrity and can be stored down to the vapor phase of liquid nitrogen
- Laser-etched 2D barcode on the base of every tube ensures secure sample tracking with the highest contrast code available for reading, even with some frost on the tubes
